WOODEN
FLOOR

UPGRADE TO THE NEW GENERATION FLOORING

Here at Sudheer Timbers, we've been dedicated to processing wood, designing and manufacturing decorative and technical solutions for your spaces for almost a hundred years.

We strive every day to address the needs of the interior design and construction sector by creating wood products and processing solid wood. Our processes ensure that the wood retains all of its qualities, while improving its efficiency through an industrial process based on the circular economy.

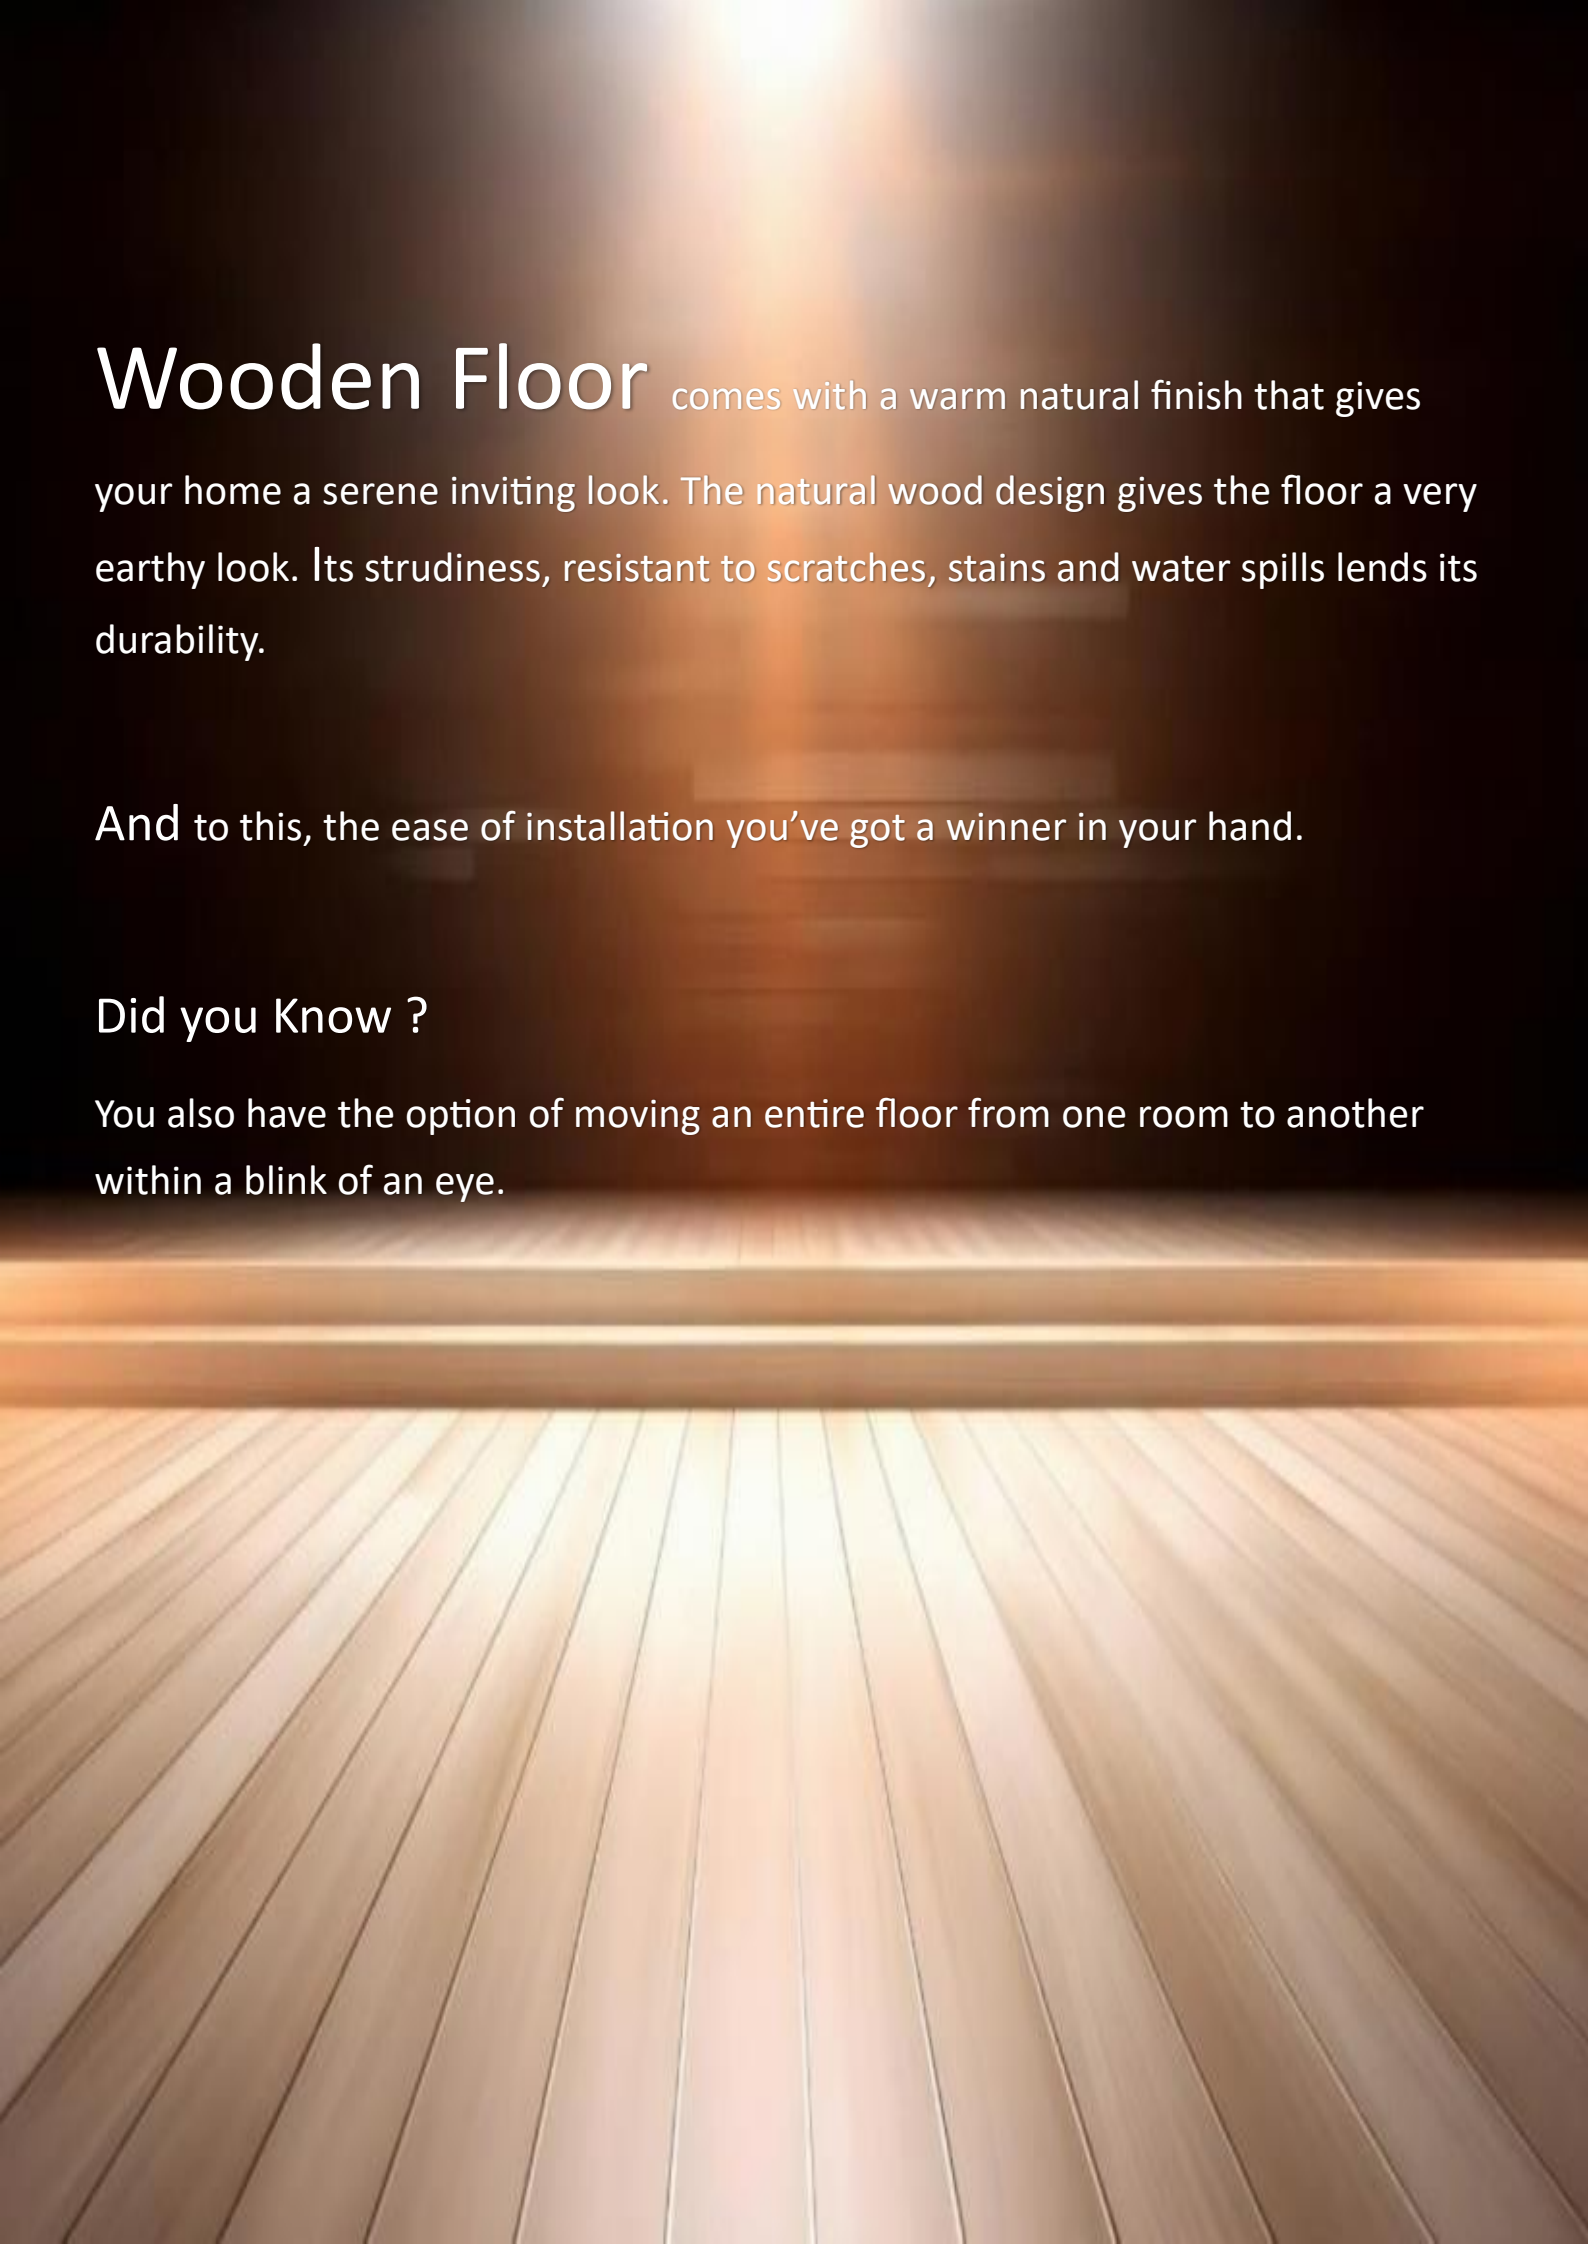

Design is in our DNA at Sudheer Timbers; not only is it the linchpin of our product creation process, but it's also one of our key strengths as a brand. This catalogue acts as an inspirational guide, pushing the boundaries of design and the materials that will become part of the spaces we inhabit in the coming years.

At our factory in Yakamuru, Vijayawada, we strive every day to make Sudheer Timbers a benchmark for quality materials in all projects, and are now one of the most recognised and reliable wooden flooring brands in the industry.

Wooden Floor

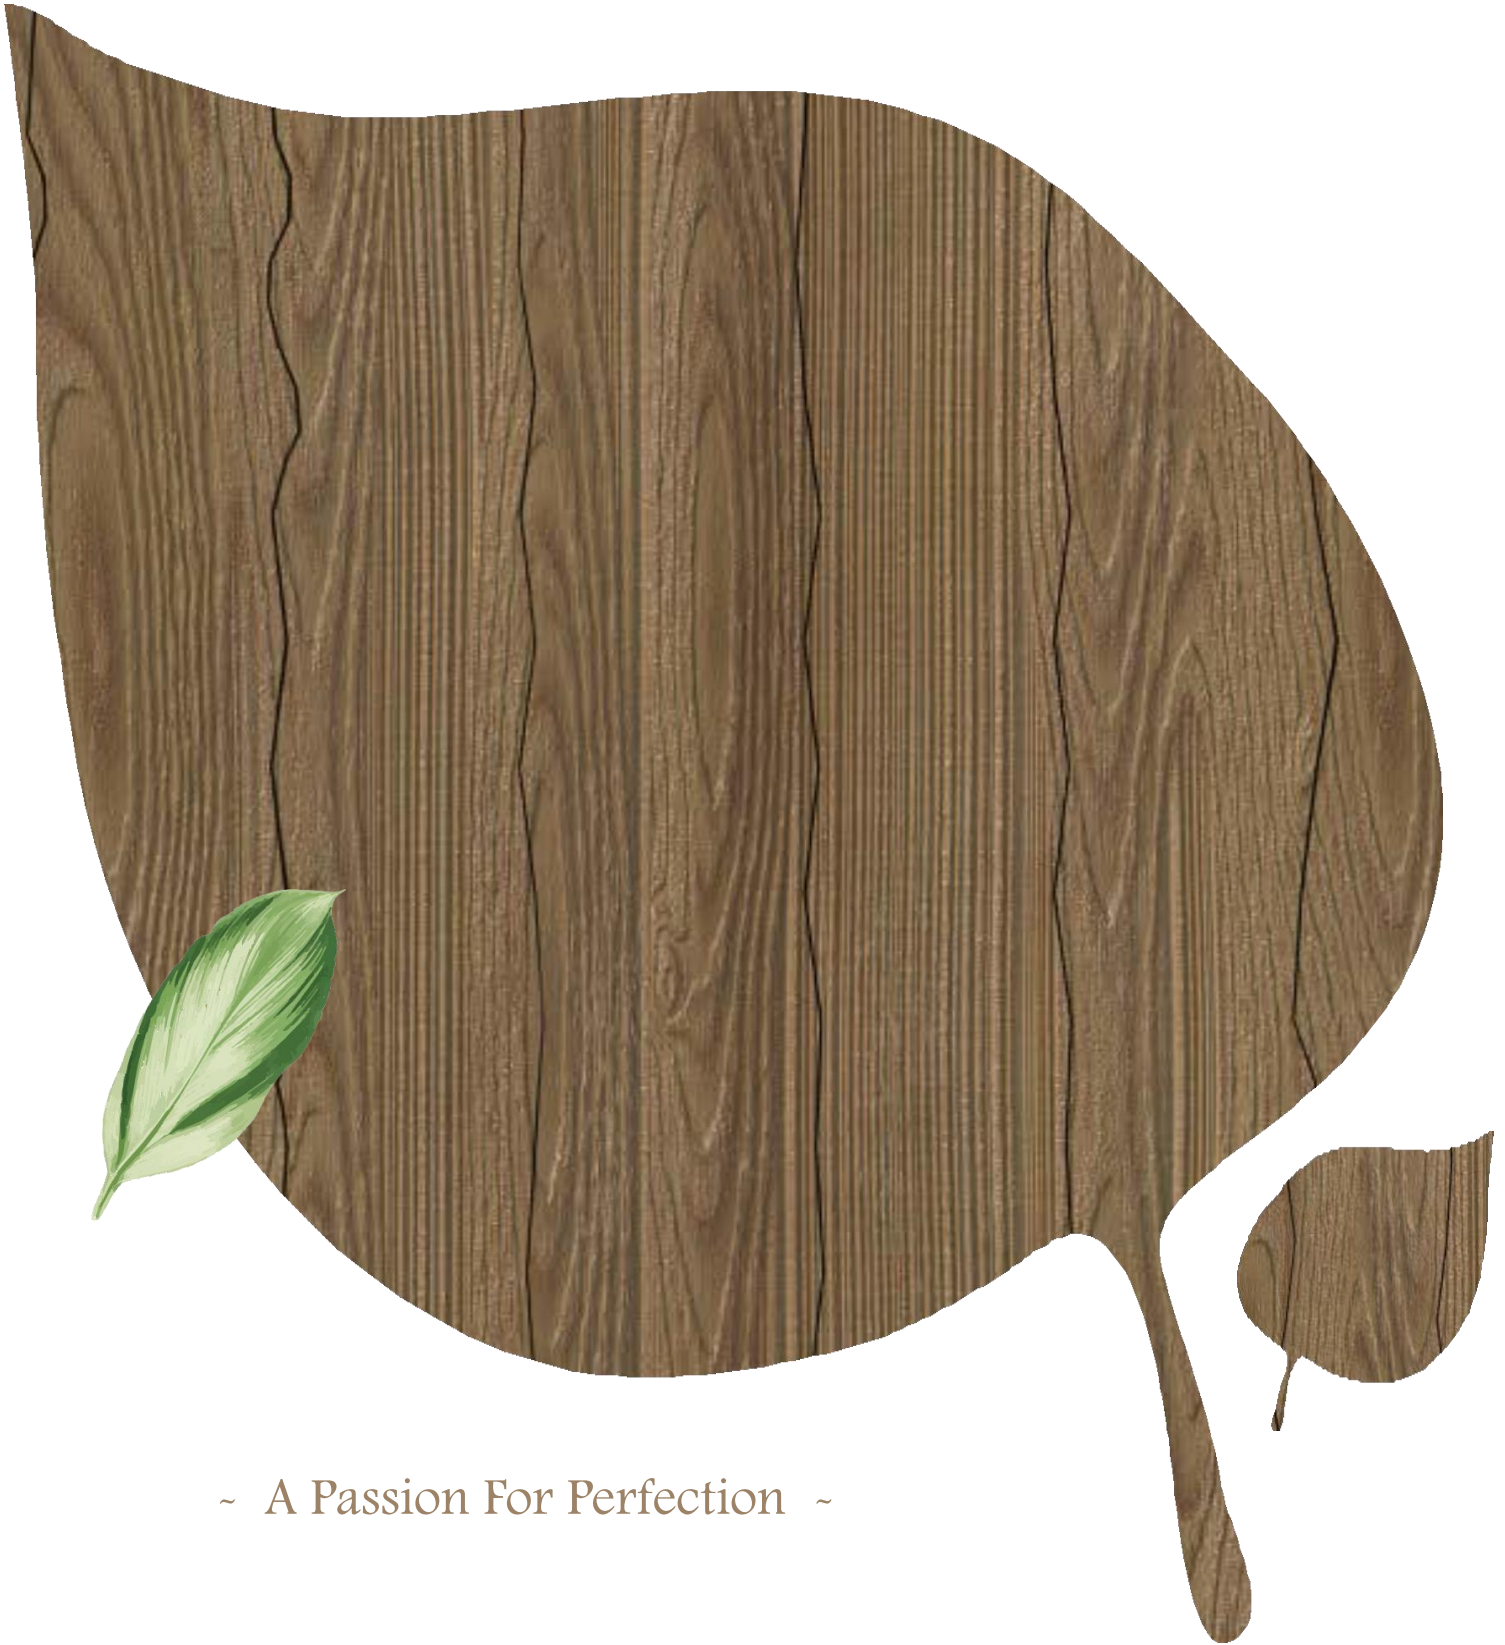

comes with a warm natural finish that gives your home a serene inviting look. The natural wood design gives the floor a very earthy look. Its sturdiness, resistant to scratches, stains and water spills lends its durability.

And to this, the ease of installation you've got a winner in your hand.

Did you Know ?

You also have the option of moving an entire floor from one room to another within a blink of an eye.

Solution For Your Stairs

Perfect Finish and Easy Fitting

The design is identical and since they are manufactured together, the nose is stronger as the floor

No Protrusion

The surface remains Flat and homogeneous

Design Continuity

The floor and the stairway produce a unified effect in the room

Maintenance

Easy to clean and maintain

High Resistance

Resistance to blows, abrasion, wear and tear

Versatile

Adapts to all step sizes and stairway forms

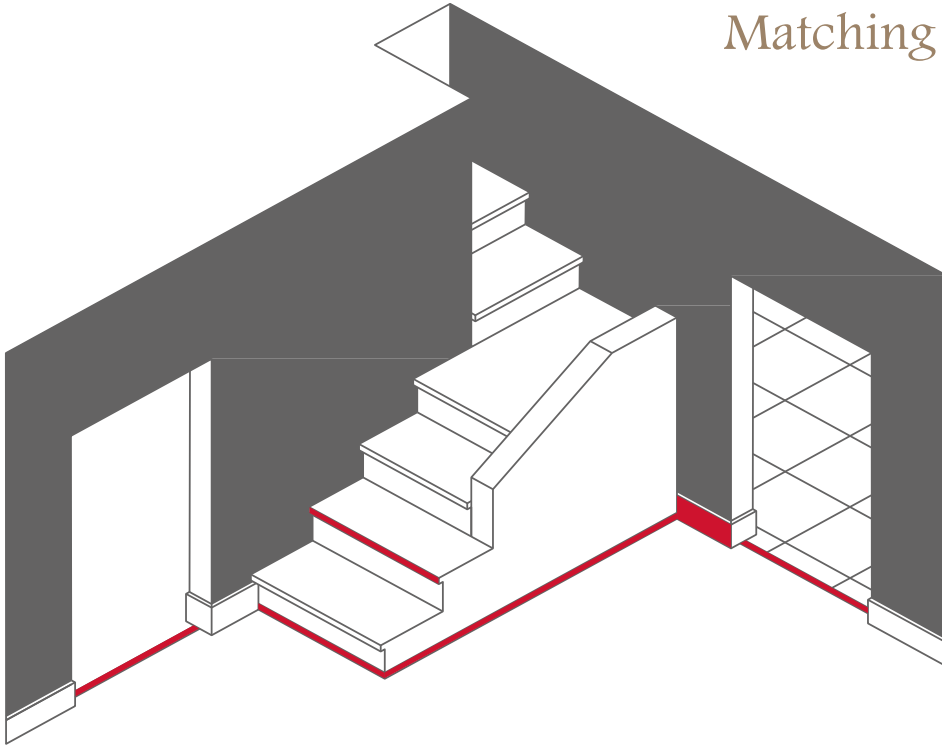

Various Finishing-Off Options

Provides different finishing touches

Accessories

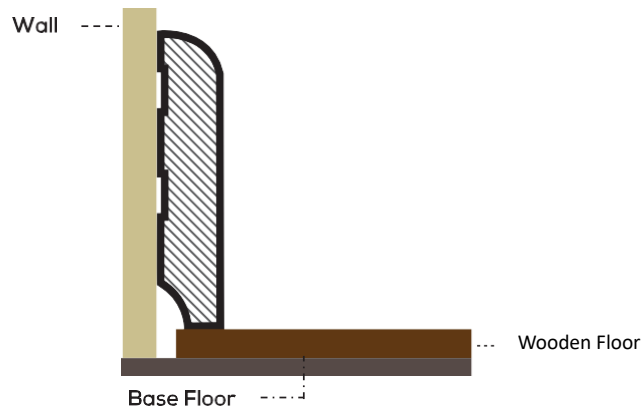

~ No Floor Is Complete Without Matching Accessories ~

Skirting

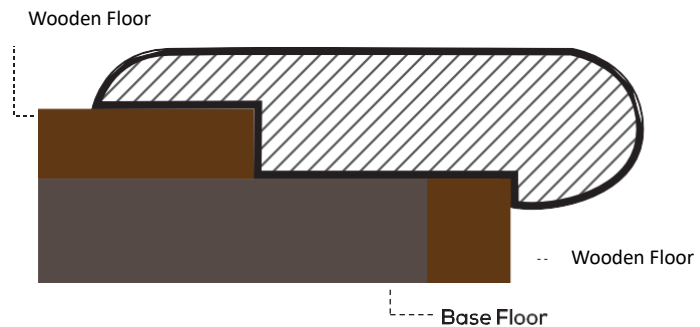

Skirting adds the final touch to your floor by cladding the lower part of the adjoining walls.

Stair Nose

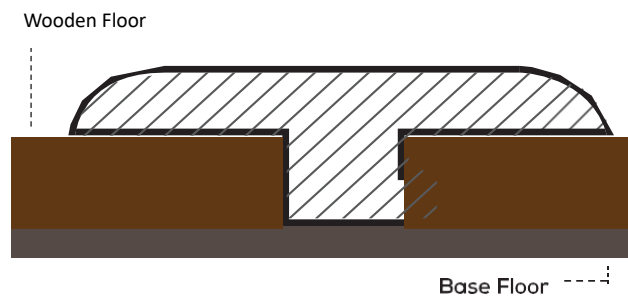

Used when your floor reaches a stepdown, creating a perfect end to every step in the staircase

T-Moulding

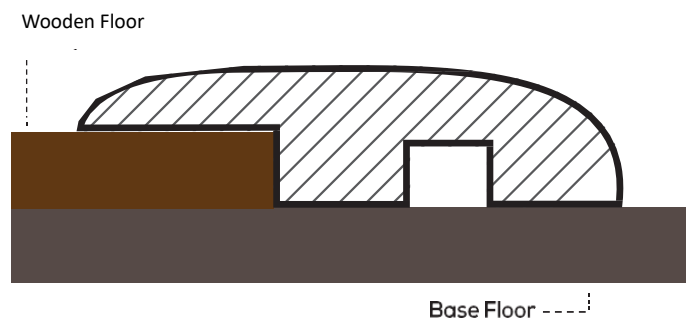

Connects two sections of the floor at the same height such as doorway and hallways

Reducer Moulding

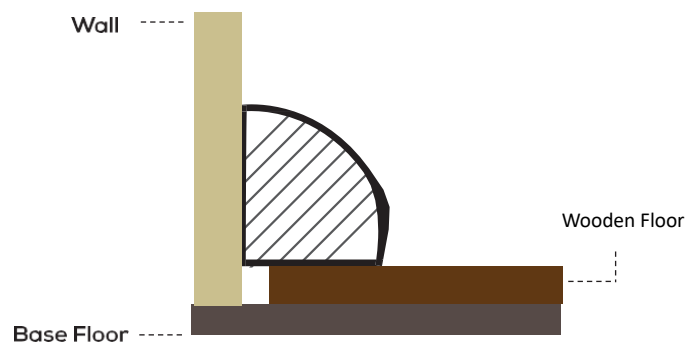

Provides smooth transition from the floor to a lower surface such as tiled floor or carpet

Beading

Creates a border between the floor and adjoining walls. Can be used as an alternative where skirting is not used

Underlay

A PE film that levels the subfloor irregularity, as well as reduce the risk of transferring humidity from the subfloor to the floor panels

Finishes And Dimensions

~ Craftmanship Meets Modernity ~

Matt Lacquer Finish

Gives textured impression of pure and untreated wood. The subtle finish does not conceal woods natural look while making it more durable and easier to clean. The soft natural surface is pleasant to walk barefoot on.

Satin Lacquer Finish

Adds lustre to the wood without hiding its character. It makes the surface pleasing to the underfoot as well as easy to maintain and hardwearing.

High Gloss Finish

The high gloss lacquer gives your floor a shiny, polished look and provides a reflecting surface. It offers an exciting alternative to more conventional wood floors.

Oil Finish

Oil brings out the fine structure and grains of the wood and enhances the natural colour. Floors should be oiled immediately after installation and regularly maintained with satin oil.

Brushed

The natural structure of the grain and texture is accentuated by mechanical brushing. Vary depends on wood species

Stained

It enhances the natural colour and tones of wood. Allows us to apply new colours.

Smoked

It alters the colour and shade of the wood. Vary from light to dark charcoal colour.

Dimensions

Linear Plank

Height – 2 ft (600mm) minimum

Width – 100mm

Thickness – 12, 15, 18mm

Linear Plank

Height – 2.5 ft (650mm) maximum

Width – 100mm

Thickness – 12, 15, 18mm

How To Choose A Floor

Selecting a design might seem overwhelming, but with us it isn't.

Floors can be easily picked to complement your interior décor.

- An earthy rugged wood design will bring your space closer to nature while smoother, lighter and softer grains will lend a subtle elegance that's chic and urban.
- Choosing a lighter wood colour will make a confined space look larger and more open while darker shades will make a large room appear cosy and intimate.
- Also do consider the tones of your furniture and walls for making a perfect

Lacquer or Oil finish?

In general, lacquered surface reflects the light more than an oiled one, while matt finish is its opposite.

Installation

The Bond That Last Forever PLANCK LOC

PLANCK LOC allows for ease of installation, giving a seamless look to your floor that withstands the effect of seasonal change and foot traffic.

UniClick Tongue & Groove Lock System

Solid wood planks of different sizes and thicknesses between 12mm and 18mm, with tongue and groove all around the outside.

Natural Solid Wood Flooring

A FINISH

A high-strength polished coating, that delivers unparalleled performance, Strength, or a penetrating treatment with natural oil that emphasizes the tactility of wood.

EVERLASTING BEAUTY

Sudheer Timbers selects high-quality timber species. With its specific technology, it is possible to sand the wooden floor repeatedly for a beauty that stands the test of time.

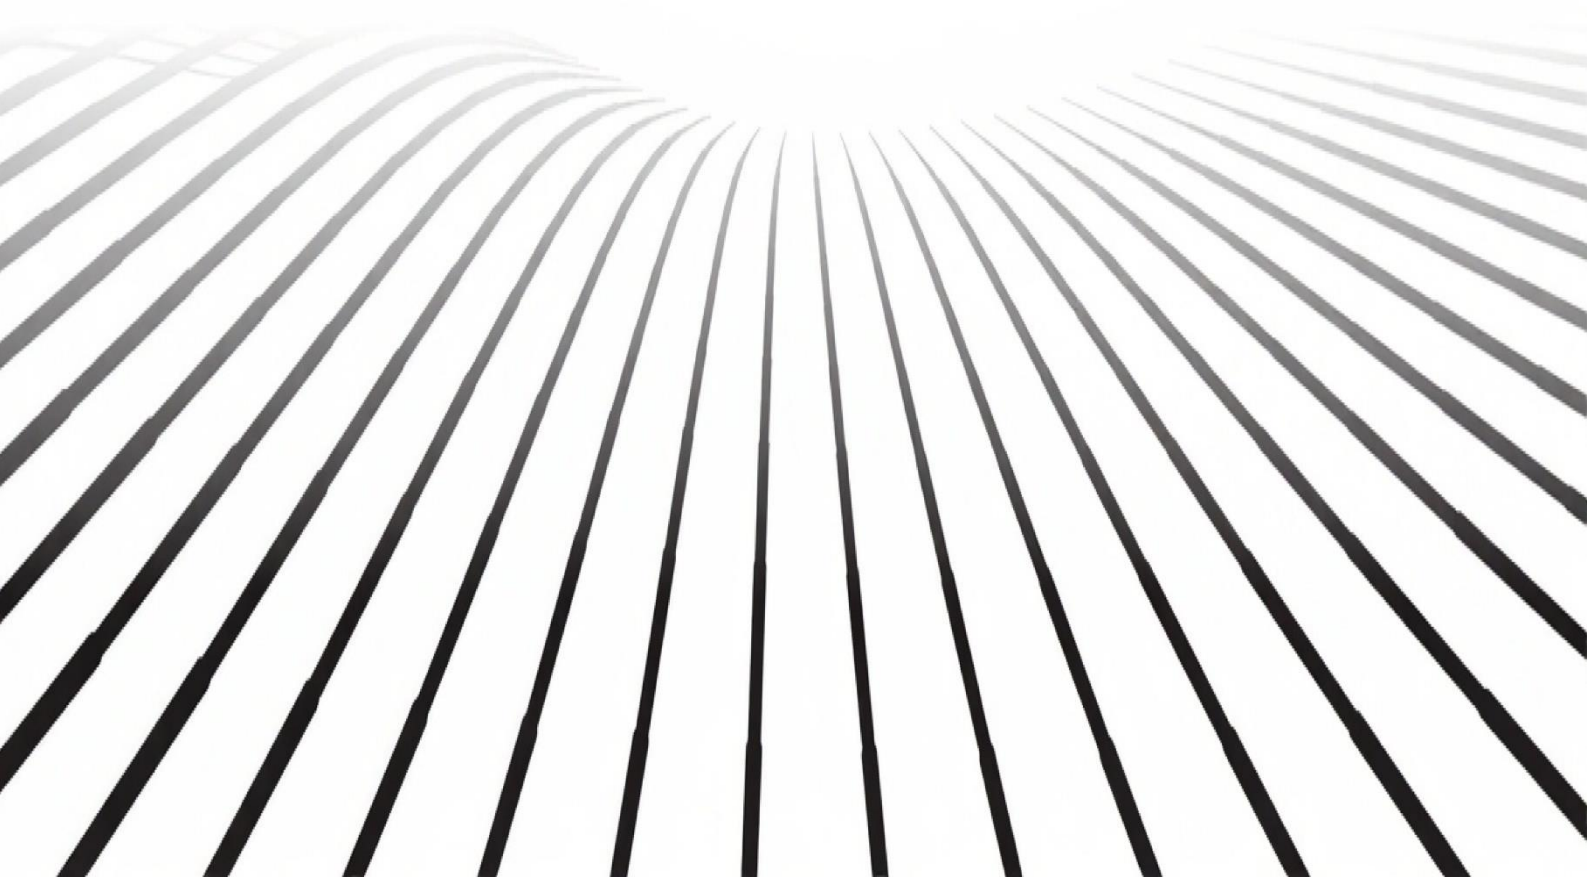

PREMIUM QUALITY LAYER

Wooden floor panels are made from the finest wood species,

is the result of a careful selection of raw materials and unique production processes. Exclusive milling methods, such as innovative drying processes, are home to production secrets; materials that gain new value at each stage. It's about striving for perfection from the beginning.

ECOLOGICAL ADHESIVES

In order to preserve the environment and health, all auxiliary products used in the manufacture of wooden floors are environmentally friendly, nontoxic and odourless. The adhesives meet the most stringent European standards in terms of solvents and formaldehydes.

Clean & Maintenance

Our floors are strong, durable and give you years of joy and comfort

The after care that wooden flooring requires is very little and extremely simple. Cleaning wooden flooring if carried out regularly, can keep your floor looking like new for many years to come.

- A simply brush over with a softheaded brush or a very slightly damp mop, is all that is needed when cleaning wooden flooring. You can use vacuum cleaner around the edges of the room.
- Special cleaning pads are available which look very much like a mop and have replaceable wipes that wrap around the pad which attracts the dust, etc. and these make cleaning wooden flooring even easier.
- For stain removal, do not use a strong detergent. Use a mild, non-abrasive cleaner.
- For large cleaning of stains. etc. on wooden flooring, use a mop with a mixture of water.
- When cleaning wooden flooring do not use steel wool, sand paper, or scouring powder on the wooden surface, and also never try to sand, wax, or apply lacquer to the wooden flooring.

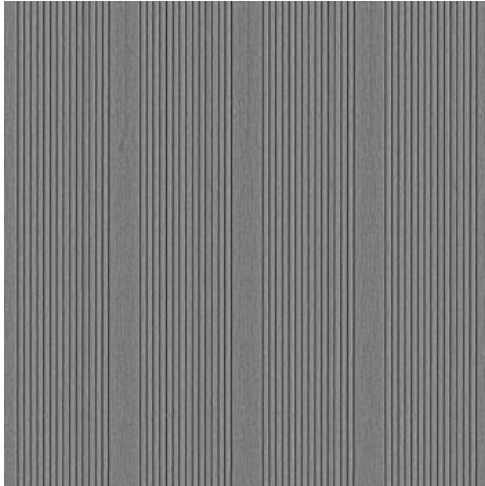

In case of Extensive Damage, the smart UniClick system enables you to easily replace a floorboard.

WHY TO CHOOSE DURABLE FLOORING ?

At Sudheer Timbers we've developed Durable technology, which allows us to offer flooring with maximum durability, guarantees that stands the test of time, while always maintaining all the benefits of wood.

Durable technology combines the advantages of high sturdiness and high dimensional stability, together with a fully hermetic click system and edge sealing to make this flooring a totally reliable solution.

This is all possible by more than 50 years of experience as wooden panel manufacturer and thus achieving the highest quality standards throughout the entire process.

WE LISTEN TO OUR CUSTOMERS. . .

We adapt our solutions to the needs of society while protecting the world around us.

At Sudheer Timbers, we firmly believe in creating flooring that's both durable and sustainable.

As proof of our commitment to sustainability, all our flooring solutions are Ecolabel certified, guaranteeing high environmental standards and certifications throughout their life cycle, which regulates formaldehyde emissions in composite wood products, thus having a positive impact on human health.

Sustainability

Wood products play a fundamental role in environment conservation and enhancing the value of natural resources. That is why we are committed to sustainability, both when designing and executing our processes, and in our environmental policy.

In addition to respecting and protecting the forests, which are our main source of raw material, at Sudheer Design Hub we're working to go beyond the limits of our workplaces with the aim of contributing to environmental development, and that of its inhabitants.

Design Your Space Design Your Life

Designed by Nature

Thanks to the natural, cellular structure of wood, hardwood floors keep your feet cozy on chilly days and comfortably cool on warm days. Wood was designed by nature to be a great insulator with thousands of air chambers per cubic inch. In fact, wood offers seven times better insulation than ceramic tiles and is much warmer than plastic laminate or thin vinyl floors naturally.
